

Problems installing and running JabloTool Desktop

JabloTool shows error message "JabloTool has encountered a problem and needs to close. We are sorry for the inconvenience..." just after start.

It looks like serious problem with your .NET Framework installation. Please reinstall .NET Framework 2.0 follow these steps:

1. download .NET Framework 2.0 (32 bit version) from [here](#).
2. close all applications on your computer
3. uninstall .NET Framework (Start->Control panel->Add remove programs->Microsoft .NET Framework 2.0)
4. run installation of .NET Framework 2.0
5. run JabloTool
