

## Arctic Light Hotel

Lapland, Finland, 2015

**The Arctic Light Hotel is a brand new contemporary hotel in Rovaniemi in the heart of Lapland. Situated at the Arctic Circle it offers unique combination of unspoiled nature, comfort, style and excellent service. Since the last refurbishment Jablocom is part of it.**

In the spring 2015 the former City Hall of Rovaniemi was reconverted into a stylish boutique hotel and opened its doors to first visitors. Fifty-seven spacious individually styled rooms and suites and delightful restaurant offer supreme comfort and personalized stay at the Arctic Circle.

Jablocom Phone Solution was chosen as telecommunication system in the hotel. Thanks to it the owners were able to avoid a considerable investment into the PBX system and laying telecommunication cables through the building. Moreover the flexibility of the entire system was appreciated. Hotels at this level are expected to completely refurbish interiors every few years and any fixed infrastructure unnecessarily increases expenses.

Today Essence phones can be found in every room, as well as at the reception and in the offices. All phones are administered via cloud platform JabloTool. It ensures that contact list is synchronized to all phones in the hotel and user rights are properly managed. Calls from rooms are restricted to intra-hotel calls and emergency numbers only.

In daily operation Jablocom Phone Solution works well and does not require any special maintenance. The predicted savings of both investment and operational costs were fully confirmed.

## Facts and figures

### Initial condition:

- Newly refurbished boutique hotel with sixty phone lines located in functionalist building
- Owner wanted to avoid investment into PBX system and wiring
- Calling restriction requested (intra-hotel calls and emergency numbers only)

### Solution:

- Jablocom Essence phones (60 pcs) administered via JabloTool cloud platform

### Results:

- Reliable and maintenance-free operation
- Significant savings on investment
